- Surface treatments
- **Make your own parts**

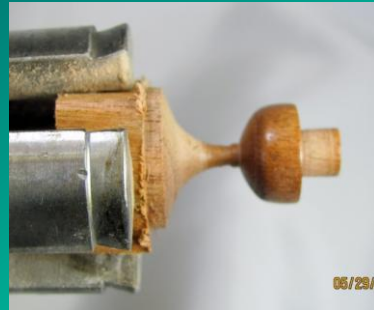

Make your own pen parts.

All slimline parts can be made from wood or other materials such as corian, antler, or acrylics.

Actually, any pen kit's parts can be made from these materials.

the Lead Bullet**

The Home Run

Just

TIPS

Use the 7mm pen mill and make shims for other kits instead of purchasing several sizes of pilot shafts with metal sleeves.

Collet chucks are very helpful for holding mandrels as well as other things such as pen parts for modifying, rifle shell and bullets for drilling when making rifle shell pens.

Forgot to order bushings for a new kit and that pen needs to ship tomorrow? Make your own bushings .

A 60° live center would be a nice addition to your pen making tool box and well worth the expense.
